

NEW BOOK OF CYPHERS: Pore Compleat and Regular than Any vet Ertant: Wherein the Whole Alphabet (twice over) Confisting of 600 CYPHERS, Is Variously Changed, Inter-Woven, and Reversed; With the Coronets of England, By Allowance of the Earl MARSHAL. As likewise Some EXAMPLES For the Ready Composition of Any CYPHER, Consisting of 3.4 or More Letters; With Ornaments Sutable to Most Occasions. Being a Work very Entertaining to Such as are Curious; And Usefull to all Sorts of Artificers in General The Whole (with the English Translated into French) Engraven on 56 Copp COMPOSED By Colonel PARSONS. LONDON, Printed for the AUTHOR, in the Old Falace Westmin and Sold by W. Rogers and H. Rhodes in Fleetstreet; E. Harris in Little Britain; T. Newborough in S. Paul's Church Yard; and B. Barker in Westminster-Hall. MDCCIV. Price (Bound) 1 Shilling

Ind The TENT of DARIUS EXPLAIND, From the French of FELIBIEN, with a Print of the Tent Engraven by MEGRIBELIN; Are likewise Sold And The VI Impression of the CHRONOLOGICAL TABLES of EUROPE; Continued to the YEAR 1703. Both by Col Parsons. S by W. Rogers, &c. Nutting Stuly

Ithough the UNDERTAKERS of FORMER CYPHER BOOKS (no Doubt) Knew very well, that 600 CYPHERS were Actually REQUIRED to COMPLEAT their ALPHABETS

Yet either to Save the Expence, or to Avoid the Great Difficulty Attending such a Double Composition, they have thought Fitt to Dispense with Half that Number;
by making AB (for Instance) to Serve for BA likewise, and so on Throughout the Whole Though it be as Preposterous, as to Write ones Surname First.

But to Draw One, & very often Both the Letters on the Reverse side, seems yet a much Greater Desect, The Reverse (at least the Greatest Part of it) Being for Uniformity sake Only:
For Hereby instead of AB & You will Find Resort Ras Incongruously Shuffled together, as if I should Write my Name WECKER ON SON OF WELLE WAS WELLE WAS WELLE WAS All which Serves rather to Amuse & Puzzle, then to Entertain or Inform either the Curious, or those who have Daily Occasion for Such Books. Vide Pa

These Extravagancies ThaveWholy Avoided, although in some Untoward Letters (for all Cyphers cannot be made to Hitt a like) I could perhapps, with such Unjustifiable Licences, have Composed (though a Worse Cypher) a much Finer Knot, as they Call it, Which Seems Rather to have been the Peculiar Care & Study of Others, than either to Composed Frue Cyphers I hems elves, or to Inform Others how to Perform them I have likewise Composed the Whole 600 Cyphers in Circles (though I mett with no small Difficulty in the Performance) that the Artists, as they shall at any time have Occasion, may the more Readily Reduce them into Ovals, Squares, &c. than when Drawn at Random only, without either Regularity or Proportion.

And because there are so Frequent Occasions for Cyphers Consisting of 3. 4. or more Letters, and that Such Compositions Throughout the Whole Alphabet would be Endless, I have at the Latter End Given some Examples, Now all such Cyphers, by the Help of this Work Only, may be Composed with the Greatest Ease and Regularity Imaginable; Which its Hoped being altogether New, as well as Generally Usefull, may neither be Un-acceptable to the Curious, nor to the Artists themselves, to whom Such Compositions have hither to Appeared so very Intricate and Troublesome. The Whole is likewise in a Manner Inter-Lenvid by being Printed on One Side only.

And since Cyphers have of late Years so Generally Obtained, that even the III Treatment of them by Ignorant Hands has not yet been Able to Gutt them out of Fashion; and that in the Coronets (which amongst the Nobility are always Used with Cyphers, Crests &c.) there have been so many Gross Mistakes Committed by Coach Painters, Carvers &c.

Thought it might be of Publick Service to Represent the True Forms & Distinctions of all the Coronets of England, By the Aprobation & Allowance of the Earl MARSHAL.

The 4Helinets Used by the Sovereign, Nobility, Knights & Esquires of England, are likewise Represented in ADistinct Plate at Last [Nimmy] With 4 Different Cartouches of Ornaments and Trophees, Curiously Performed by Miscribelin; Being very Sutable to the 4 Cheif Military Employments, Viz: The Sea The Horse The Foot, and The Ordnance: Which with Those of Arts and Sciences in General [Ning.] are Thought Sufficient (as Specimens only) to Shew how Cyphers may be very Properly Adorned on Most Occasions.

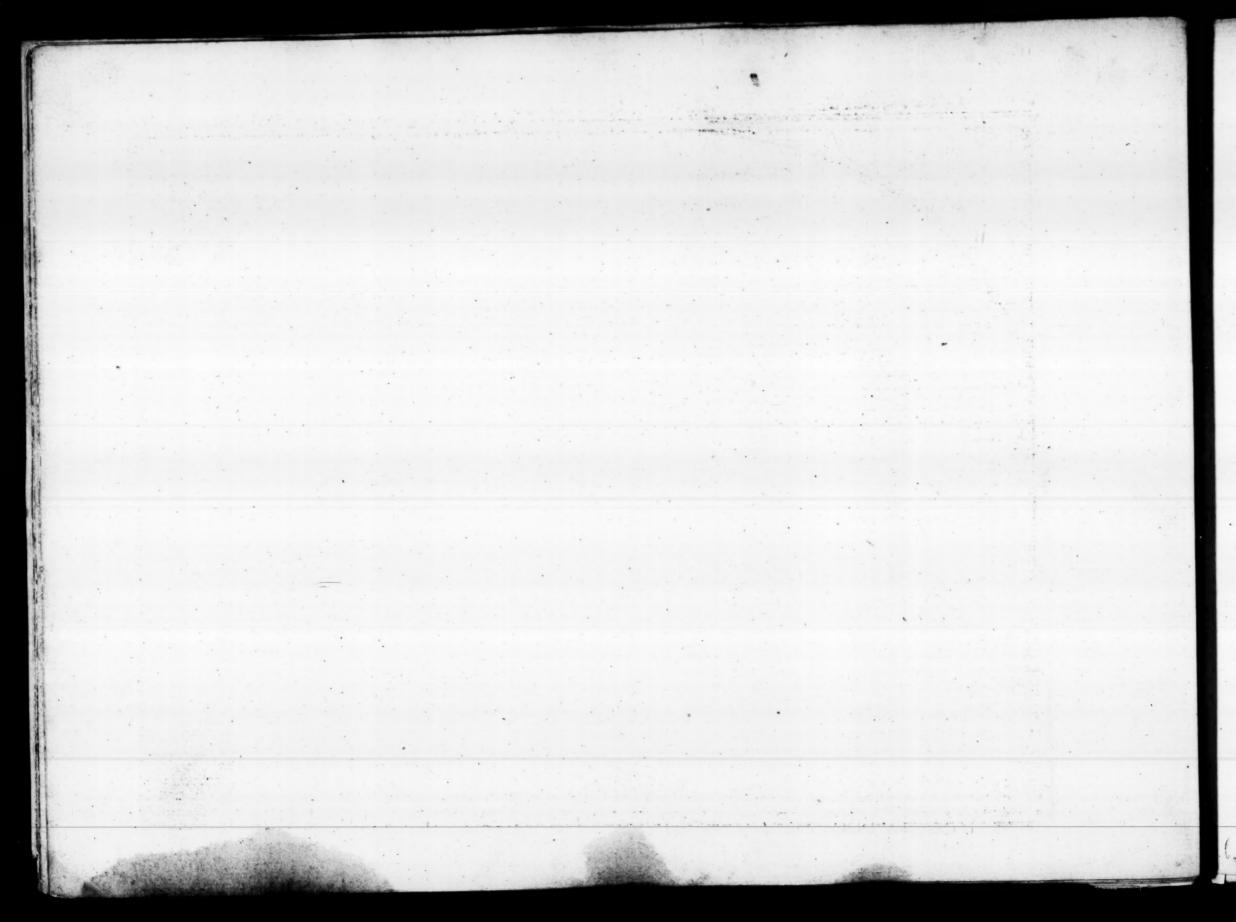

The Several Hatchings of the 7 Colours Generally Used in Heraldry, as they Should be Expressed and Distinguished in the Engravings of all Sort of Plate, Smuff Boxes, &c.

are also Represented (in 7 Different Escutcheons) in the Same Page; Whereby Any Coat of Arms, if Duly Executed, may be as Effectually Blazoned as if Actually Painted.

To Conclude Thave Omitted Nothing, either Material or Ornamental, to Compleat and Enrich this Laborious Undertaking, The Last I Propose to my Self)

To Conclude Thave Omitted Nothing, either Material or Ornamental, to Compleat and Enrich this Laborious Undertaking, The Last 3 Propole to my Sett)

Neither has there been Any Care or Pains Wanting, in the Performance Throughout by the Ablest Hands, to Make it the more Generally Usefull to all Sorts of Artificers,
or the more Entertaining and Diverting to all Such as are Curious; And that this Usefull Work may be the more Acceptable to Foreigners, The English is all Putt into French.
